SIR MACFARLANE BURNET, O.M., F.R.S.

16th February, 1959

Dear Joshua,

Many thanks for your note. After discussing the matter with Gus, I have written to Morison at the Rockefeller Foundation asking whether the Foundation would sponsor the travel side of the Nossals' trip including a month or two in Europe on the way back to Australia in 1960-61. The general tone of the letter was that Nossal was going to be a key figure in the Institute's immunological work after his return and that we wanted him to get experience and insight from American work and European contacts - without any more financial worry than is inevitable.

I am still deep in the revision of Principles of Animal Virology for a new edition and have nothing on the immunological side to report.

Kindest regards,

Yours sincerely,

Mac Burnet
